OLD BUSINESS

- Review of the Hume Solar Project-C. Clark states, the Hume Town Board is at the final stage of signing their agreement. They have agreed to a dollar value and they are waiting on a question about how the PILOT would be paid, once the panels are taken down. If they decommission the panels, there will no longer be a PILOT, as the project will end. Once that is finalized, they will have an agreement and we can move forward on our actions.
- Other Solar Project updates-A spreadsheet was given to the Board, regarding the status of the ongoing, solar projects. C. Clark states, because we are doing so many solar projects, he has put them on this spreadsheet and plans to archive the closed projects, on a second sheet. The Rushford and Burns projects are complete and operational. These could be archived, as well as, Project Block, which was a cancelled project. We have gone through our actions, for these projects and will add the new projects. Several of the projects are preparing to finish the paperwork and close with the PILOTS in place.
- Microenterprise Grant-Next Phase-C. Clark states, the Microenterprise Grant is finished. We are awaiting that closure, officially, with CBDG and the Department of State. Then, we can go ahead with another application, for \$200,000.00. They are happy with our contract, closing it within the June contract timeline. We finished in January. The Microenterprise Grant has gone well and, we will follow up with all seven grantees. Most of them are doing well but, it would be nice to know, long term, how they are continuing to work. The turnaround for the next grant should be pretty quick, a month or two. The plan is to have it by this summer. We already have applicants interested and they are going through training, right now. The training is through Accord and Incubator Works. This training helps them develop a true business plan.
- Travel Center Update-C. Clark states, CPL has completed the geotechnical work and the wetlands delineation. Surveys are scheduled for this week. Then, we can look back, once we received the data, sit down with CPL, and discuss the preliminary design. We are getting close to receiving the layout.

 - (B) The Project consists of the replacement, rehabilitation or reconstruction of a structure or facility, in kind, on the same site and the purchase of equipment.
